1 Introduction

[Introduction text goes here...]

2 [Main Topic 1]

[Text content...]

2.1 [Subtopic 1.1]

[Text content...]

Theorem 2.1 Important Equation

$$E = mc^2$$

This is a continuation of the above theorem

Corollary 2.1 Edge cases

This is a corollary to the above

- Bullet point 1
- Bullet point 2

2.2 [Subtopic 1.2]

[Text content...]

Definition 2.1 (Special theory of relativity). *This is an example definition*

Proposition 2.1 NVIDIA is better than AMD

This is an example proposition

Example 2.1.

$$\det \begin{pmatrix} 2 & 3 \\ 6 & 10 \end{pmatrix} = 2(10) - 3(6) = 2$$

Property 2.1 (Properties of Transpose). 1. $(A^T)^T = A$

2. $(A + B)^T = A^T + B^T$

3. $(cA)^T = cA^T$

4. $(AB)^T = B^T A^T$ (note the reversal of order)

Claim 2.1 I am not claiming anything

Example

Remark 2.1 (Non-commutativity). *In general, matrix multiplication is **not commutative**: $AB \neq BA$.*

Question 1: Very important question

What is the mass of the earth?

The solution to the above is...

Note:-

Keep this in mind
